

Hands-On-Networking From Theory to Practice.

Merani, Maria Luisa, Maurizio Casoni and Walter Cerroni. *Hands-On-Networking From Theory to Practice*. New York, NY: Cambridge University Press, 2009, 259 pp. \$75.00 (Hardbound).

Learn the core theory and engage with real-world networking issues with this richly illustrated example-based textbook.

Hands-On Networking provides students with:

- An accurate view of modern networks through detailed coverage of the most relevant networking technologies,
- Carefully designed, affordable laboratory exercises based on open-source software networking tools for hands-on practice with real networking devices
- Numerous case studies and examples that link theory to practice,
- A bottom-up approach that is easy to follow and perfect for lab-oriented courses.

Maria Luisa Merani is an Associate Professor at the University of Modena and Reggio Emilia, Italy, where she has taught networking courses since 1993. She is an IEEE Senior Member, an Editor of the IEEE Transactions on Wireless Communications, and is the author of more than 70 technical papers in the field.

Maurizio Casoni is an Associate Professor in Telecommunications at the University of Modena and Reggio Emilia, Italy.

Walter Cerroni is an Assistant Professor in Telecommunications at the University of Bologna, Italy. His teaching experience covers different aspects of communication networks, with most of the courses integrating theory and laboratory exercises or simulations.
